

BABYTECH

30 years of experience
Domestic water treatment
and industrial.

BABY 10 is a mobile ion exchange softener for water production soft to fill heating installations according to the VDI 2035 standard.

the softening of the water, the formation of limestone in the exchangers will be greatly diminished.

The BABY 10 comes in the form of a portable polyethylene softener, fitted on the top of a meter to measure the volume used.

Softened "outgoing" water will be 0 ° F.

Once the maximum capacity is reached, replace the resin by unscrewing the head provided with an oring seal with the refill delivered in a 10-liter bucket.

Technical data	BABY 10	BABY 20
Water meter connection	oui	oui
